Requirements

Season: Spring before last frost

Sun: Full sun

Water: Good drainage. Water lightly daily if soil is dry.

Wind: Moderate

Climate: 10-30 deg C

Soil Notes: PH 6.0 to 6.8. Keep enough space from other plants. Planting radishes in the same row allow them to break the crust and mark the furrows.

Propagation: From seed or head

Sprout Time: 1-3 weeks

Harvest: 60-80 days

Interesting Notes

Don't plant in the same soil for more than 3 consecutive years to avoid diseases.
